Grogol Petamburan, West Jakarta, DKI Jakarta

Quality Assurance Engineer with 3+ years of experience in manual and automation testing across Web, API, and Mobile applications. Experienced in designing test cases, executing functional, regression, SIT, UAT, API, and end-to-end testing, as well as identifying and documenting software defects throughout the software development lifecycle. Proficient in Playwright, Selenium, Appium, Postman, JavaScript, Java, and Python, with hands-on experience testing payment gateway, marketplace, identity verification, AI, and human resources applications.

Work Experiences

PT Usaha Kreatif Indonesia - North Jakarta, DKI Jakarta

Jun 2025 - Present

Quality Assurance Engineer

- Developed comprehensive test cases, test data, and testing documentation based on business and functional requirements to ensure adequate test coverage.
- Performed manual and automated testing for Payment & Settlement (Payment Gateway) web applications using Playwright, JavaScript, and Selenium Library, covering functional, API, end-to-end, and regression testing to improve test coverage and reduce regression cycles.
- Conducted manual API & UI testing for AI-powered Digital Marketing applications, validating API requests, responses, business logic, data processing, and error-handling scenarios.
- Performed manual testing for Human Resources applications across Web and Mobile platforms, validating HR workflows, functional requirements, user interactions, and cross-platform functionality.
- Conducted functional, regression, System Integration Testing (SIT), and User Acceptance Testing (UAT) throughout the software development lifecycle.
- Identified, reproduced, documented, and tracked software defects with detailed reproduction steps and supporting evidence to facilitate efficient debugging and resolution.
- Collaborated with Business Analysts, Developers, and cross-functional teams to clarify requirements, investigate defects, and ensure features meet business expectations.

PT Paramadaksa Teknologi Nusantara - Tangerang, Banten

Jan 2024 - Jun 2025

Quality Assurance Engineer

- Developed comprehensive test cases, test data, and testing documentation based on business requirements to ensure effective test coverage.
- Performed manual and automated testing for B2B and B2C marketplace applications across Web and Mobile platforms using Java, Appium, and SeleniumLibrary, covering functional, integration, and regression testing to improve test coverage and reduce regression cycles.
- Conducted API and UI testing for OCR and identity verification systems, including validation of KTP data extraction and facial similarity matching to ensure the accuracy and reliability of the identity verification process.
- Executed functional, regression, System Integration Testing (SIT), User Acceptance Testing (UAT), and Production Trial Run (PTR) to validate system functionality, integration, and production readiness.
- Identified, reproduced, documented, and tracked production and development defects using detailed reproduction steps and supporting evidence.
- Collaborated with Business Analysts and development teams to review Change Requests (CR), clarify requirements, and ensure alignment between business needs and system implementation.
- Conducted regression testing following system enhancements and bug fixes to verify that existing functionalities remained stable.

Internship (Backend Developer)

- Developed backend services for the company’s internal core service modules, significantly enhancing overall system functionality and performance.
- Engineered front-end user interfaces (UI) for internal corporate websites, contributing to a more intuitive and seamless user experience (UX).
- Conducted System Integration Testing (SIT) for internal web platforms to ensure seamless module interoperability and system stability.
- Identified and resolved technical bugs within web applications, effectively minimizing operational disruptions and ensuring system reliability.

Education Level

Bakrie University - South Jakarta, DKI Jakarta, Indonesia <i>Bachelor of Information Systems, 3.76/4.00</i>	Sep 2024 - Jul 2026
Telkom University - Bandung, West Java, Indonesia <i>Associate of Information Systems</i>	Aug 2020 - Jul 2023

Organisational Experience

Badan Eksekutif Mahasiswa <i>Student Welfare Advocacy Staff (Staf Departemen Advokasi Kesejahteraan Mahasiswa)</i>	Mar 2022 - Apr 2023
• Developed financial assistance programs for students struggling with semester tuition fees, ensuring continued access to education through crucial financial support. • Facilitated a student feedback platform to resolve campus grievances and streamlined communication between students and the university administration.	

Skills, Achievements & Other Experience

- **Hard Skills** : Playwright, Jira, Javascript, Python, Figma, Java, Selenium, Mongo DB, MySQL, PostgreSQL, Katalon, HTML, CSS, Ms. Office, Appium, Microsoft Power BI
- **Soft Skills**: Analytical Thinking, Strategic Communication, Problem Solving, Empathy, Attention to Detail, Adaptability & Continuous Learning
- **Cyber Academy (Classical Cryptography for Beginner Course)** (2025) : Certified in Classical Cryptography for Beginners; successfully mastered all foundational modules and course criteria.
- **Cyber Academy (Introduction to Information Security Course)** (2025) : Completed "Introduction to Information Security," demonstrating a comprehensive understanding of course modules and requirements.
- **BNSP Professional Competency Certification – Business Intelligence Analyst** (2026): Successfully completed the BNSP Professional Competency Certification for Business Intelligence Analyst in 2026, validating competencies in business intelligence, data analysis, data visualization, and analytical reporting.
- **Software Quality Assurance Tester – Cypress E2E (UI) Testing** (2024): Successfully completed the Software Quality Assurance Tester certification in Cypress E2E (UI) Testing, demonstrating competency in end-to-end testing of web application user interfaces using Cypress.
- **Software Quality Assurance Tester – Cypress E2E (API) Testing** (2024): Successfully completed the Software Quality Assurance Tester certification in Cypress E2E (API) Testing in API testing and end-to-end test automation using Cypress.
- **Manual API Testing** (2024): Successfully completed the Manual API Testing certification in manually validating API functionality, requests, responses, and test scenarios.
- **Google IT Support Professional Certificate** (2022): Completed the Google IT Support Professional Certificate through Coursera, developing foundational knowledge in IT support, troubleshooting, networking, operating systems, system administration, and security.
